PART I

ITEM 1. BUSINESS.

(a) General Development of Business

PACCAR Inc (the Company), incorporated under the laws of Delaware in 1971, is the successor to Pacific Car and Foundry Company which was incorporated in Washington in 1924. The Company traces its predecessors to Seattle Car Manufacturing Company formed in 1905.

(b) Financial Information About Industry Segments and Geographic Areas

Information about the Company's industry segments and geographic areas in response to Items 101(b), (c)(1)(i), and (d) of Regulation S-K appears on page 49 of the Annual Report to Stockholders for the year ended December 31, 2006 and is incorporated herein by reference.

(c) Narrative Description of Business

The Company has two principal industry segments, (1) design, manufacture and distribution of light-, medium- and heavy-duty trucks and related aftermarket distribution of parts and (2) finance and leasing services provided to customers and dealers. The Company's finance and leasing activities are principally related to Company products and associated equipment. Other manufactured products include industrial winches.

TRUCKS

The Company and its subsidiaries design and manufacture heavy-duty diesel trucks which are marketed under the Peterbilt, Kenworth, and DAF nameplates. These vehicles, which are built in four plants in the United States, three in Europe and one each in Australia, Canada, and Mexico, are used worldwide for over-the-road and off-highway hauling of freight, petroleum, wood products, construction and other materials.

The Company, through its Peterbilt and Kenworth Divisions, competes in the North American medium duty (Class 6/7) markets primarily with conventional models. These medium-duty trucks are assembled at the Company's Ste. Therese, Quebec plant and at the Company's facility in Mexicali, Mexico. The Company competes in the European light/medium (6 to 15 metric ton) commercial vehicle market with DAF cab-over-engine trucks assembled in the United Kingdom by Leyland, one of the Company's wholly owned subsidiaries.

Commercial trucks and related replacement parts comprise the largest segment of the Company's business, accounting for 93% of total 2006 net sales and revenues.

Substantially all trucks and related parts are sold to independent dealers. The Kenworth and Peterbilt nameplates are marketed and distributed by separate divisions in the U.S. and a foreign subsidiary in Canada. The Kenworth nameplate is also marketed and distributed by foreign subsidiaries in Mexico and Australia. The DAF nameplate is marketed and distributed by a foreign subsidiary headquartered in the Netherlands. A U.S. division, PACCAR International, also markets all three nameplates outside each of their primary markets. The decision to operate as a subsidiary or as a division is incidental to Truck Segment operations and reflects legal, tax and regulatory requirements in the various countries where PACCAR operates.

The Truck Segment utilizes centrally managed purchasing, information technology, technical research and testing, treasury and finance functions. Certain manufacturing plants in North America produce trucks for more than one nameplate in common production facilities, while other plants produce trucks for only one nameplate, depending on various factors. Also, as a result of the close similarity of the business models employed by each nameplate, best manufacturing practices within the Company are shared on a routine basis.

The Company's trucks are essentially custom products and have a reputation for high quality. For a significant portion of the Company's truck operations, major components, such as engines, transmissions and axles, as well as a substantial percentage of other components, are purchased from component manufacturers pursuant to PACCAR and customer specifications. DAF, which is more vertically integrated, manufactures its own engines and axles and a higher percentage of other components for its heavy truck models. The value of truck components manufactured by independent suppliers ranges from approximately 45% in Europe to approximately 90% in North America.

Raw materials and other components used in the manufacture of trucks are purchased from a number of suppliers. The Company's DAF subsidiary purchases fully assembled cabs from a competitor, Renault V.I., for its European light-duty product line pursuant to a joint product development and long-term supply contract. Sales of trucks manufactured with these cabs amounted to approximately 2% of consolidated revenues in 2006. A short-term loss of supply, and the resulting interruption in the production of these trucks, would not have a material effect on the Company's results of operations. However, a loss of supply for an extended period of time would either require the Company to contract for an alternative source of supply or to manufacture cabs itself. Other than these components, the Company is not limited to any single source for any significant component, although the sudden inability of a supplier to deliver components could have a temporary adverse effect on production of certain products. No significant shortages of materials or components were experienced in 2006. Manufacturing inventory levels are based upon production schedules and orders are placed with suppliers accordingly.

Replacement truck parts are sold and delivered to the Company's independent dealers through the Company's parts distribution network. Parts are both manufactured by the Company and purchased from various suppliers. Replacement parts inventory levels are determined largely by anticipated customer demand and the need for timely delivery. As a percentage of total consolidated net sales and revenues, parts sales were 11.8% in 2006, 12.0% in 2005 and 11.8% in 2004.

There were three other principal competitors in the U.S. and Canada Class 8 truck market in 2006. The Company's share of that market was 25.3% of retail sales in 2006. In Europe there were five other principal competitors in the commercial vehicle market in 2006, including parent companies to two competitors of the Company in the United States. In 2006, DAF had a 14.5% share of the Western European heavy-duty market and a 9.6% share of the light/medium market. These markets are highly competitive in price, quality and service, and PACCAR is not dependent on any single customer for its sales. There are no significant seasonal variations in sales.

The Peterbilt, Kenworth, and DAF nameplates are recognized internationally and play an important role in the marketing of the Company's truck products. The Company engages in a continuous program of trademark and trade name protection in all marketing areas of the world.

The Company's truck products are subject to environmental noise and emission regulations and competing manufacturers are subject to the same regulations. The Company believes the cost of complying with noise and emission regulations will not be detrimental to its business.

The Company had a total production backlog of \$3.5 billion at the end of 2006. Within this backlog, orders scheduled for delivery within three months (90 days) are considered to be firm. The 90-day backlog approximated \$2.7 billion at December 31, 2006, and \$2.5 billion at December 31, 2005. Production of the year-end 2006 backlog is expected to be substantially completed during 2007.

OTHER BUSINESS

The Truck and Other businesses include a division of the Company which manufactures industrial winches in two U.S. plants and markets them under the Braden, Carco, and Gearmatic nameplates. The markets for these products are highly competitive and the Company competes with a number of well established firms. Sales of industrial winches were less than 1% of net sales and revenues in 2006, 2005 and 2004.

The Braden, Carco, and Gearmatic trademarks and trade names are recognized internationally and play an important role in the marketing of those products.

FINANCIAL SERVICES

In North America, Australia and 13 European countries, the Company provides financing and leasing arrangements, principally for its manufactured trucks, through wholly owned finance companies operating under the PACCAR Financial or PacLease trade names. They provide inventory financing for independent dealers selling PACCAR products, and retail and lease financing for new and used trucks and other transportation equipment sold principally by its independent dealers. Receivables are secured by the products financed or leased.

The Company also conducts full service leasing operations through wholly owned subsidiaries in North America under the PacLease trade name. Selected dealers in North America are franchised to provide full service leasing. The Company provides its franchisees equipment financing and managerial support. The Company also operates full service lease outlets on its own behalf.

PATENTS

The Company owns numerous patents which relate to all product lines. Although these patents are considered important to the overall conduct of the Company's business, no patent or group of patents is considered essential to a material part of the Company's business.

REGULATION

As a manufacturer of highway trucks, the Company is subject to the National Traffic and Motor Vehicle Safety Act and Federal Motor Vehicle Safety Standards promulgated by the National Highway Traffic Safety Administration as well as environmental laws and regulations in the United States, and is subject to similar regulations in Canada, Mexico, Australia and Europe. In addition, the Company is subject to certain other licensing requirements to do business in the United States and Europe. The Company believes it is in compliance with laws and regulations applicable to safety standards, the environment and other licensing requirements in all countries where it has operations.

Information regarding the effects that compliance with international, federal, state and local provisions regulating the environment have on the Company's capital and operating expenditures and the Company's involvement in environmental cleanup activities is included in Management's Discussion and Analysis of Financial Condition and Results of Operations and the Company's Consolidated Financial Statements incorporated by reference in Items 7 and 8, respectively.

EMPLOYEES

On December 31, 2006, the Company employed a total of approximately 21,000 persons.

OTHER DISCLOSURES

The Company's filings on Form 10-K, 10-Q, and 8-K and any amendments to those reports can be found on the Company's website www.paccar.com free of charge as soon as practicable after the report is electronically filed with, or furnished to, the Securities and Exchange Commission. The information on our website is not incorporated by reference into this report.

ITEM 1A. RISK FACTORS.

The following are significant risks which could negatively impact the Company's financial condition or results of operations.

Business and Industry Risks

The commercial truck market demand is variable. Demand for commercial vehicles depends to some extent on economic and other conditions in a given market and the introduction of new vehicles and technologies. Further, the yearly demand for commercial vehicles may increase or decrease more than overall gross domestic product in markets the Company serves which are principally North America and Western Europe. Demand may also be affected by factors impacting new truck prices such as costs of raw materials and components and cost of compliance with governmental regulations (including tariffs, engine emissions regulations, import regulation and taxes).

The financial services industry is highly competitive. The Company competes with banks, other commercial finance companies and financial services firms which may have lower costs of borrowing, higher leverage or market share goals that result in a willingness to offer lower interest rates, which may lead to decreased margins, lower market share or both. A decline in the Company's commercial truck unit sales, an increase in residual value risk due to lower used truck pricing and increased funding costs are also factors which may negatively affect the Company's financial services operations.

The financial services segment is subject to credit risk. The financial services segment is exposed to the risk of loss arising from the failure of a customer, dealer or counterparty to meet the terms of the loans, leases and derivative contracts with the Company. Although the financial assets of the financial services segment are secured by underlying equipment collateral, in the event a customer cannot meet its obligations to the Company, there is a risk that the value of the underlying collateral will not be sufficient to recover the amounts owed to the Company resulting in credit losses.

Political, Regulatory and Economic Risks

The Company's operations could be subject to currency and interest rate fluctuations. The Company's consolidated financial statements, which are presented in U.S. dollars, are affected by foreign currency exchange fluctuations through both translation and transaction risk. The Company uses certain derivative financial instruments and localized production of its products to reduce, but not eliminate, the effects of interest rate and foreign currency exchange rate fluctuations.

The Company may be adversely affected by political instabilities, fuel shortages or interruptions in transportation systems, natural calamities, wars, terrorism and labor strikes. The Company is subject to various risks associated with conducting business worldwide.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

Not applicable.

ITEM 2. PROPERTIES.

The Company and its subsidiaries own and operate manufacturing plants in five U.S. states, three countries in Europe, and one each in Australia, Canada and Mexico. The Company also has a number of parts distribution centers, sales and service offices, and finance and administrative offices which are operated in owned or leased premises in these and other countries. Facilities for product testing and research and development are located in Washington state and the Netherlands. The Company's corporate headquarters is located in owned premises in Bellevue, Washington. The Company considers all of the properties used by its businesses to be suitable for their intended purposes.

Substantially all the Company's manufacturing facilities increased their production in 2006 compared to the prior year. The Company continuously invests in facilities, equipment and processes to provide manufacturing and warehouse capacity to meet its customers' needs.

The following summarizes the number of the Company's manufacturing plants by geographical location within indicated industry segments:

| | U.S. | Canada | Australia | Mexico | Europe |
|-------|------|--------|-----------|--------|--------|
| Truck | 4 | 1 | 1 | 1 | 3 |
| Other | 2 | - | - | - | - |

ITEM 3. LEGAL PROCEEDINGS.

The Company and its subsidiaries are parties to various lawsuits incidental to the ordinary course of business. Management believes that the disposition of such lawsuits will not materially affect the Company's business or financial condition.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

No matters were submitted to a vote of security holders during the fourth quarter of 2006.
