**NOTE A - Basis of Presentation**

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the first quarter ended March 31, 2010, are not necessarily indicative of the results that may be expected for the year ending December 31, 2010. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

*Earnings per Share:* Basic earnings per common share are computed by dividing earnings by the weighted average number of common shares outstanding, plus the effect of any participating securities. Diluted earnings per common share are computed assuming that all potentially dilutive securities are converted into common shares under the treasury stock method. The dilutive and antidilutive options are shown separately in the table below.

Three Months Ended March 31	2010	2009
Additional shares	1,050,900	922,900
Antidilutive options	1,846,400	4,030,700

*Debt Issuance:* In March 2010, the Company's U.S. finance subsidiary, PACCAR Financial Corp., issued \$300.0 of floating rate medium-term notes which settled in early April.

**NOTE B - Investments in Marketable Securities**

The cost of marketable debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. Amortization, accretion, interest, dividend income and realized gains and losses are included in investment income. The cost of securities sold is based on the specific identification method.

The Company's investments in marketable securities are classified as available-for-sale. These investments are stated at fair value with any unrealized gains or losses, net of tax, included as a component of accumulated other comprehensive loss. The proceeds from sales of marketable securities for the three months ended March 31, 2010 were \$56.7. Gross realized gains were \$.2 and \$.1 for the three months ended March 31, 2010 and 2009, respectively, with no realized losses.

<b>Maturities:</b>	<b>AMORTIZED COST</b>	<b>FAIR VALUE</b>
<b>2010</b>	<b>\$ 95.7</b>	<b>\$ 95.9</b>

**NOTE C—Inventories**

Inventories are stated at the lower of cost or market. Cost of inventories in the United States is determined principally by the last in, first out (LIFO) method. Cost of all other inventories is determined principally by the first in, first out (FIFO) method.

Inventories include the following:

	March 31, 2010	December 31, 2009
Finished products	<b>\$ 321.4</b>	\$ 312.5
Work in process and raw materials	<b>388.6</b>	487.5
	<b>710.0</b>	800.0
Less LIFO reserve	<b>(164.5)</b>	(167.9)
	<b>\$ 545.5</b>	\$ 632.1

Under the LIFO method of accounting (used for approximately 50% of March 31, 2010 inventories), an actual valuation can be made only at the end of each year based on year-end inventory levels and costs. Accordingly, interim valuations are based on management's estimates of those year-end amounts.

**NOTE D - Finance Receivables**

Loans represent fixed- or floating-rate loans to customers collateralized by the vehicles purchased. Retail direct financing and sales-type finance leases are contracts leasing equipment to retail customers and dealers, respectively. These leases are reported as the sum of minimum lease payments receivable and estimated residual value of the property subject to the contracts, reduced by unearned interest on finance leases which is shown separately. Dealer wholesale financing represents floating-rate wholesale loans to PACCAR dealers for new and used trucks. The loans are collateralized by the trucks being financed. Interest and other receivables are interest due on loans and leases and other amounts due in the normal course of business.

The allowance for losses for loans, leases and other are evaluated together as a group since they relate to a similar customer base and their contractual terms require regular payment of principal and interest primarily over 36 to 60 months and are secured by the same type of collateral. The allowance for credit losses consists of both a specific reserve and a general reserve.

**NOTE E - Product Support Liabilities**

Product support liabilities include reserves related to product warranties and optional extended warranties and repair and maintenance (R&M) contracts. The Company generally offers one-year warranties covering most of its vehicles and related aftermarket parts. Specific terms and conditions vary depending on the product and the country of sale. Optional extended warranty and R&M contracts can be purchased for periods which generally range up to five years. Warranty expenses and reserves are estimated and recorded at the time products or contracts are sold based on historical data regarding the source, frequency and cost of claims, net of any recoveries. PACCAR periodically assesses the adequacy of its recorded liabilities and adjusts them as appropriate to reflect actual experience.

Changes in warranty and R&M reserves are summarized as follows:

	2010	2009
Beginning balance, January 1	\$ 386.4	\$ 450.4
Cost accruals and revenue deferrals	43.5	62.3

**NOTE I - Derivative Financial Instruments**

Derivative financial instruments are used to hedge exposures to fluctuations in interest rates and foreign currency exchange rates. Certain derivative instruments designated as either cash flow hedges or fair value hedges are subject to hedge accounting. Derivative instruments that are not subject to hedge accounting are held as economic hedges. The Company's policies prohibit the use of derivatives for speculation or trading. At inception of each hedge relationship, the Company documents its risk management objectives, procedures and accounting treatment. Exposure limits and minimum credit ratings are used to minimize the risks of counterparty default. The Company had no material exposures to default at March 31, 2010.

*Interest-Rate Contracts:* The Company enters into various interest-rate contracts, including interest-rate swaps and cross currency interest-rate swaps. Interest-rate swaps involve the exchange of fixed for floating rate or floating for fixed rate interest payments based on the contractual notional amounts in a single currency. Cross currency interest-rate swaps involve the exchange of notional amounts and interest payments in different currencies. These contracts are used to manage exposures to fluctuations in interest rates and foreign currency exchange rates. Net amounts paid or received are reflected as adjustments to interest expense.

At March 31, 2010, the notional amount of the Company's interest-rate contracts was \$3,160.0. Notional maturities for all interest-rate contracts are \$1,066.4 for 2010, \$1,145.7 for 2011, \$743.2 for 2012, \$34.6 for 2013 and \$144.3 for 2014 and \$25.8 for 2015. The majority of these contracts are floating to fixed swaps that effectively convert an equivalent amount of commercial paper and other variable rate debt to fixed rates.

*Foreign-Exchange Contracts:* The Company enters into foreign-exchange contracts to hedge certain anticipated transactions and assets and liabilities denominated in foreign currencies, particularly the Canadian dollar, the euro, the British pound, the Australian dollar and the Mexican peso. At March 31, 2010, the notional amount of the outstanding foreign-exchange contracts was \$170.8. Foreign-exchange contracts mature within one year.

Substantially all of the Company's interest-rate contracts and some foreign-exchange contracts have been designated as cash flow hedges. The Company uses regression analysis to assess and measure effectiveness of interest-rate contracts. For foreign-exchange contracts, the Company performs quarterly assessments to ensure that critical terms continue to match. Gains or losses on the ineffective portion of cash flow hedges are recognized currently in earnings and were immaterial for 2009. Hedge accounting is discontinued prospectively when the Company determines that a derivative financial instrument has ceased to be a highly effective hedge.

**Fair Value Hedges**

Changes in the fair value of derivatives designated as fair value hedges are recorded in earnings together with the changes in fair value of the hedged item attributable to the risk being hedged.

**Notes to Consolidated Financial Statements (Unaudited)** (Millions, Except Share Amounts)

The (income) or expense recognized in earnings related to fair value hedges was included in Interest and other borrowing expenses in the Financial Services segment as follows:

For the three months ended March 31,	2010	2009
Interest-rate swaps	\$ (1.0)	\$ (5.6)
Term notes	\$ 1.1	\$ 6.3

**Cash Flow Hedges**

Changes in the fair value of derivatives designated as cash flow hedges are recorded in accumulated other comprehensive income to the extent such hedges are considered effective. Amounts in accumulated other comprehensive income are reclassified into net income in the same period in which the hedged transaction affects earnings. Net realized gains and losses from interest-rate contracts are recognized as an adjustment to interest expense. Net realized gains and losses from foreign-exchange contracts are recognized as an adjustment to cost of sales or to financial services interest expense, consistent with the hedged transaction.

The following table presents the pre-tax effects of derivative instruments recognized in earnings and Other Comprehensive Income (OCI):

For the three months ended March 31,	2010		2009	
	Interest-rate Contracts	Foreign-exchange Contracts	Interest-rate Contracts	Foreign-exchange Contracts
(Gain) loss recognized in OCI:				
Truck and Other		\$ .5		\$ (0.1)
Financial Services	\$ 18.0		\$ 5.3	
<b>Total</b>	<b>\$ 18.0</b>	<b>\$ .5</b>	<b>\$ 5.3</b>	<b>\$ (0.1)</b>

(Income) expense reclassified from Accumulated OCI into income:

Truck and Other:				
Cost of sales		\$ .1		\$ (7.5)
Interest and other expense (income), net		.4		(0.3)
Financial Services:				
Interest and other borrowing expenses	\$ 31.1		\$ 21.6	
<b>Total</b>	<b>\$ 31.1</b>	<b>\$ .5</b>	<b>\$ 21.6</b>	<b>\$ (7.8)</b>

Of the \$39.0 accumulated net loss on derivative contracts included in accumulated other comprehensive loss as of March 31, 2010, \$35.5, net of taxes, is expected to be reclassified to interest expense or cost of sales in the following 12 months. The fixed interest earned on finance receivables will offset the amount recognized in interest expense, resulting in a stable interest margin consistent with the Company's risk management strategy.

**Economic Hedges**

Changes in the fair value of economic hedges are recorded in earnings in the period in which the change occurs.

The (income) or expense recognized in earnings related to economic hedges is as follows:

For the three months ended March 31,	2010		2009	
	Interest-rate Contracts	Foreign-exchange Contracts	Interest-rate Contracts	Foreign-exchange Contracts
<b>Truck and Other:</b>

**NOTE J - Fair Value Measurements**

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchy of fair value measurements is described below.

Level 1 – Valuations are based on quoted prices that the Company has the ability to obtain in actively traded markets for identical assets or liabilities. Since valuations are based on quoted prices that are readily and regularly available in an active market or exchange traded market, valuation of these instruments does not require a significant degree of judgment.

Level 2 – Valuations are based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 – Valuations are based on model-based techniques for which some or all of the assumptions are obtained from indirect market information that is significant to the overall fair value measurement and which require a significant degree of management judgment. The Company has no financial instruments requiring Level 3 valuation.

The Company uses the following methods and assumptions to measure fair value for assets and liabilities subject to recurring fair value measurements.

*Marketable Securities:* The Company's marketable debt securities consist of municipal bonds, government obligations, investment-grade corporate obligations, commercial paper, asset-backed securities and term deposits.

The fair value of government obligations is based on quoted prices in active markets. These are categorized as Level 1.

PACCAR Inc – Form 10-Q

**Notes to Consolidated Financial Statements (Unaudited)** (Millions, Except Share Amounts)

The fair value of municipal bonds, corporate bonds, asset-backed securities, commercial paper and term deposits is estimated using an industry standard valuation model, which is based on the income approach. The significant inputs into the valuation model include quoted interest rates, yield curves, credit rating of the security, and other observable market information. These are categorized as Level 2.

*Derivative Financial Instruments:* The Company's derivative contracts consist of interest-rate swaps, cross currency swaps and foreign currency exchange contracts.

These derivative contracts are over the counter and their fair value is determined using industry standard valuation models, which are based on the income approach. The significant inputs into the valuation models include market inputs such as interest rates, yield curves, currency exchange rates, credit default swap spreads, and forward spot rates. These contracts are categorized as Level 2.

PACCAR's financial assets and liabilities subject to recurring fair value measurements are either Level 1 or Level 2 as follows:

<b>Used trucks held for sale:</b>

Financial Services	95.8	124.7
<b>Total used trucks held for sale</b>	<b>\$ 119.1</b>	<b>\$ 152.8</b>

The carrying amount of used trucks held for sale is written down when appropriate to reflect their fair value. The Company determines the fair value of used trucks from a matrix pricing model, which is based on the market approach. The significant observable inputs into the valuation model are recent sales prices of comparable units, the condition of the vehicles, and the number of similar units to be sold.

Used truck write-downs during the quarter ended March 31, 2010 were \$7.6, with \$2.5 recorded as cost of sales in the truck segment and \$5.1 recorded in the financial services segment (operating lease depreciation expense of \$4.7 and credit losses of \$.4).

**Notes to Consolidated Financial Statements (Unaudited)** (Millions, Except Share Amounts)

The Company used the following methods and assumptions to determine the fair value of financial instruments that are not recognized at fair value as described below.

*Cash and Cash Equivalents:* Carrying amounts approximate fair value.

*Trade Receivables and Payables:* Carrying amounts approximate fair value.

*Financial Services Net Receivable:* For floating-rate loans, wholesale financing, and interest and other receivables, fair values approximate carrying values. For fixed-rate loans that are not impaired, fair values are estimated using discounted cash flow analysis based on current rates for comparable loans. Finance lease receivables and the related loss provisions have been excluded from the accompanying table.

*Debt:* The carrying amounts of financial services commercial paper, variable-rate bank loans and variable-rate term notes approximate fair value. For fixed-rate debt, fair values are estimated using discounted cash flow analysis based on current rates for comparable debt.

The carrying amount and fair value of fixed-rate loans and fixed-rate debt at March 31, 2010 and December 31, 2009 were as follows:

	March 31, 2010		December 31, 2009

**NOTE K - Employee Benefit Plans**

PACCAR has several defined benefit pension plans, which cover a majority of its employees. The following information details the components of net pension expense for the Company's defined benefit plans:

Three Months Ended March 31	2010	2009
Service cost	<b>\$ 9.4</b>	\$ 10.1
Interest on projected benefit obligation	<b>19.1</b>	18.0

Net pension expense	<b>\$ 8.4</b>	\$ 10.1

During the first three months of 2010, the Company contributed \$19.3 to its pension plans.

**NOTE L - Severance Costs**

During the first quarter of 2010, the Company did not incur any severance expense and did not have any amounts accrued for future severance payments at March 31, 2010.

During the first quarter 2009, the Company incurred severance costs of \$9.7 in the truck segment and \$.1 in the financial services segment. The costs incurred in 2009 were the result of work force adjustments reflecting low truck demand, primarily in Europe.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

**RESULTS OF OPERATIONS:**

Three Months Ended March 31	2010	2009
Net sales and revenues:		
Truck and Other	\$ 1,984.3	\$ 1,730.4
Financial Services	246.4	255.8
	\$ 2,230.7	\$ 1,986.2
Income before taxes:		
Truck and Other	63.4	13.3
Financial Services	28.1	15.3
Investment Income	4.5	8.0
Income taxes	(27.7)	(10.3)
Net Income	\$ 68.3	\$ 26.3
Diluted Earnings Per Share	\$ .19	\$ .07

**Overview:**

PACCAR recorded higher sales and net income in the first three months of 2010 compared to the prior year. First quarter 2010 net income was \$68.3 million (\$.19 per diluted share) compared to \$26.3 million (\$.07 per diluted share) in the first quarter of 2009.

Net sales and revenues for the Truck and Other businesses was \$1.98 billion in the first quarter of 2010 compared to \$1.73 billion in the first quarter of 2009. The increase in sales and revenues for 2010 reflects increased truck unit sales in the U.S. and Canada due to a small "pre-buy" as customers transition to the new EPA 2010 engine emission technology and higher parts sales in all markets resulting from an increase in truck transportation.

First quarter 2010 total net sales and revenues and income before income taxes were positively affected by the translation of stronger foreign currencies, primarily the euro, the Australian and Canadian dollar and the British pound. The translation effect increased first quarter 2010 sales and revenues by \$112.6 million and income before income taxes by \$10.2 million compared to the first quarter of 2009.

Truck and Other Cost of sales and revenues were \$1.77 billion in the first quarter of 2010 compared to \$1.56 billion in the first quarter of 2009. Cost of sales and revenues increased primarily due to the higher truck and parts sales, partially offset by improved factory capacity utilization and lower severance costs.

Research and development (R&D) expenditures increased to \$54.8 million in the first quarter of 2010 from \$52.3 million in the first quarter of 2009 primarily due to higher foreign currency translation effects of \$1.8 million.

Selling, general and administrative (SG&A) expense for Truck and Other of \$94.1 million in the first quarter of 2010 increased from \$88.4 million in the first quarter of 2009. The higher spending reflects foreign currency translation effects of \$4.1 million, higher sales and marketing spending and travel costs, partially

offset by lower severance costs. As a percentage of sales, SG&A decreased in the first quarter to 4.7% in 2010 from 5.1% in 2009.

Financial Services segment revenues for the first quarter of 2010 decreased to \$246.4 million from \$255.8 million in the first quarter of 2009. The decreased revenues in the first quarter resulted from lower earning asset balances in all markets. First quarter 2010 Financial Services income before income taxes increased to \$28.1 million from \$15.3 million in the first quarter of 2009 primarily due to lower interest and other borrowing expenses from economic hedges and a decline in average debt balances. In addition, the first quarter 2010 provision for losses on receivables declined \$3.3 million to \$21.7 million from \$25.0 million in the prior year reflecting lower charge-offs and a larger reduction in the allowance for losses due to a decrease in past due accounts and a lower asset base.

Investment income declined to \$4.5 million for the first quarter of 2010 compared to \$8.0 million for the first quarter of 2009 due to lower invested balances and lower market interest rates.

The effective tax rate was 28.9% in the first quarter of 2010 compared to 28.1% for the first quarter of 2009. The first quarter 2010 tax provision includes a benefit of \$11.3 million from a favorable tax settlement which was offset by the effects of other assessments and a lower percentage benefit from permanent differences such as the R&D tax credit and tax exempt income.

The Company's return on revenues improved to 3.1% in the first quarter of 2010 from 1.3% for the first quarter of 2009.

### **Truck**

PACCAR's truck segment, which includes the manufacture and distribution of trucks and related aftermarket parts, accounted for 88% of revenues in the first quarter compared to 86% in the first quarter of 2009. In North America, trucks are sold under the Kenworth and Peterbilt nameplates and, in Europe, under the DAF nameplate.

## 2010 Compared to 2009:

PACCAR's worldwide truck sales and revenues of \$1.97 billion in the first quarter of 2010 increased 15% compared to the first quarter of 2009 due to an increase in truck units delivered and higher demand for the Company's parts reflecting an increase in truck transportation.

Sales and revenues in the U.S. and Canada during the three month period ended March 31, 2010 increased 22% compared to the first quarter of 2009 due to higher new truck deliveries, reflecting higher truck market demand and improved heavy duty truck market share. The heavy duty truck market size increased to 27,800 units in the first quarter of 2010 from 25,400 units in the comparable quarter of 2009, primarily due to a small "pre-buy" related to the transition to EPA 2010 emissions.

In the first quarter of 2010, European net sales and revenues decreased to \$695.9 million from \$700.8 million in 2009. The lower net sales and revenues resulted from lower truck market demand, which was partially offset by higher 15 tonne and above truck market share, improved parts sales and a stronger euro. The 15 tonne and above truck market in Western and Central Europe decreased to 37,200 units in the first quarter of 2010 from 52,200 units in the comparable quarter of 2009.

Sales and revenues in Mexico, Australia and export markets increased 48% to \$263.1 million in the first quarter of 2010 primarily due to higher new truck deliveries and parts sales from higher overall market demand.

Truck segment income before income taxes increased to \$66.6 million in the first quarter of 2010 from \$25.4 million of income in the first quarter of 2009. The increase was due to higher truck sales and margins partially offset by small increases in R&D and SG&A expenses, reflecting continued cost controls.

Net sales and revenues and gross margins for truck units and aftermarket parts are provided below. The aftermarket parts gross margin includes direct revenues and costs, but excludes certain truck segment costs.

Three Months Ended March 31	2010	2009	% change
Net sales and revenues:			
Trucks	\$ 1,460.5	\$ 1,251.4	17

	<b>\$ 1,965.7</b>	<b>\$ 1,702.4</b>	<b>15</b>

Aftermarket parts	170.2	158.6	7
	<b>\$ 213.6</b>	<b>\$ 163.0</b>	<b>31</b>

\* percentage not meaningful

Gross Margin %:

Trucks	3.0%	0.4%
Aftermarket parts	33.7%	35.2%
Truck segment	10.9%	9.6%

Total truck segment gross margins for the first quarter of 2010 increased to 10.9% from 9.6% in the first quarter of 2009. The increase in gross margins was favorably impacted by higher truck gross margins which increased to 3.0% from higher demand, lower severance costs and increased absorption of fixed costs from higher truck production. Gross margins for parts in 2010 decreased from the prior year due to a higher mix of lower margin service parts.

## Truck Outlook

Heavy duty truck sales in the U.S. and Canada are expected to be in the range of 110,000–140,000 units, up slightly from 2009, reflecting some economic growth and an aging truck fleet. The current challenging economic conditions in Europe are expected to continue in 2010 with the market size of above 15-tonne vehicles expected to be in the range of 150,000–180,000 units, in line with 2009. See the Forward Looking Statement section of Management's Discussion and Analysis for factors that may affect this outlook.

## Financial Services

The PACCAR Financial Services (PFS) segment, which includes wholly owned subsidiaries in the U.S., Canada, Mexico, Europe and Australia, derives its earnings primarily from financing and leasing PACCAR products.

## 2010 Compared to 2009:

### New Loan and Lease Volume

In the first quarter of 2010, new loan and lease volume increased 60% compared to the first quarter 2009, reflecting increased new PACCAR truck production and increased finance market share. In the first quarter of 2010, PFS market share on new PACCAR trucks delivered increased to 26.3% from 18.0% in the first quarter of 2009 from increased financing to high quality fleet customers, primarily in the U.S., Canada and Europe.

### Revenues

PFS revenues declined 4% in the first quarter of 2010 due to lower interest and fee income partially offset by higher operating lease, rental and other income.

Interest and fees in the first quarter of 2010 declined from the first quarter of 2009 primarily due to lower average loan and finance lease assets summarized as follows:

Three Months Ended March 31	2010
Interest and fees - 2009	\$ 132.2
Lower average loan and finance lease balances	(22.3)
Increase in yield	.1
Interest and fees - 2010	\$ 110.0

The decline in loan and finance lease average earning assets was due to declines in retail loan and finance lease assets as portfolio collections exceeded new loan and lease volume in all markets, as well as, lower dealer wholesale financing in Europe, Mexico and Australia due to a decline in dealer inventory levels.

Operating lease, rental and other income in the first quarter of 2010 increased to \$136.4 million from \$123.6 million in the prior year from higher rental utilization and higher average rental rates, reflecting an increase in market demand. In addition, first quarter 2010 revenues increased due to higher sales of used trucks acquired from PACCAR truck customers as part of new truck sales packages.

### Expenses

Interest and other borrowing expenses decreased in the first quarter of 2010 compared to the first quarter of 2009 due to lower average debt balances and lower borrowing rates as summarized below:

Three Months Ended March 31	2010
Interest and other borrowing expenses - 2009	\$ 91.3
Lower average debt balances	(19.8)
Lower borrowing rates	(1.9)
Lower expense from economic hedges	(12.5)
Interest and other borrowing expenses - 2010	\$ 57.1

Average debt balances decreased due to the lower level of funding needed for a smaller financial services portfolio. Borrowing rates were lower primarily due to lower expenses from economic hedges as well as a decline in market interest rates.

First quarter 2010 depreciation and other expenses of \$118.0 increased from \$102.9 in the first quarter of 2009, due to higher depreciation and higher expense from the sale of used trucks. First quarter 2010 depreciation was \$85.7 million compared to \$79.4 million in 2009 reflecting both higher impairments on returned operating lease assets as well as higher losses on the sale of aged operating lease assets.

Selling, general and administrative (SG&A) expense of \$21.5 million in the first quarter of 2010 was comparable to the first quarter of 2009 due to continued cost controls.

The provision for losses on receivables for the first quarter is summarized as follows:

	Three Months Ended March 31, 2010			Three Months Ended March 31, 2009		
	Net Charge-offs	Increase (decrease) in allowance	Provision for losses on receivables	Net Charge- offs	Increase (decrease) in allowance	Provision for losses on receivables
U.S. and Canada	\$ 12.2	\$ (3.5)	\$ 8.7	\$ 15.6	\$ (6.1)	\$ 9.5
Europe	10.3	(2.8)	7.5	10.3	3.6	13.9
Mexico and Australia	3.9	1.6	5.5	2.4	(.8)	1.6
	<b>\$ 26.4</b>	<b>\$ (4.7)</b>	<b>\$ 21.7</b>	<b>\$ 28.3</b>	<b>\$ (3.3)</b>	<b>\$ 25.0</b>

The provision for losses on receivables in the first quarter of 2010 decreased to \$21.7 from \$25.0 million in the first quarter of 2009. The decrease reflects a reduction in net portfolio charges-offs in the U.S. and Canada, partially offset by higher charge-offs in Mexico. In addition, first quarter 2010 results included a larger decrease in the allowance for credit losses of \$4.7 million compared to \$3.4 million in the first quarter of 2009, reflecting a declining asset base and lower past due balances in the U.S., Canada and Europe.

At March 31,	2010	2009
Percentage of retail loan and lease accounts		
30+ days past due:		
U.S. and Canada	1.7%	2.6%
Europe	4.6%	5.5%
Mexico and Australia	10.2%	12.0%
<b>Total</b>	<b>4.0%</b>	<b>4.9%</b>

Worldwide PFS accounts 30+ days past-due at March 31, 2010 decreased to 4.0% of portfolio balances from 4.9% at March 31, 2009 as an increase in freight tonnage has led to improvement in customer cash flows in all markets, except Mexico.

## Financial Services Outlook

Earning assets at the end of 2010 are expected to be comparable to year-end 2009 levels. Slow economic conditions will continue to exert pressure on the profit margins of truck operators and challenge some customers ability to make timely payments to the Company. Improving economic conditions may lead to lower levels of past due accounts, truck repossessions and voluntary truck returns. See the Forward Looking Statement section of Management's Discussion and Analysis for factors that may affect this outlook.

## Other Business

Included in Truck and Other is the Company's winch manufacturing business. Sales from this business represent approximately 1% of net sales for 2010 and 2009.

	March 31, 2010	December 31, 2009
Cash and cash equivalents	\$ 1,854.7	\$ 1,912.0
Marketable debt securities	246.7	219.5
	<b>\$ 2,101.4</b>	<b>\$ 2,131.5</b>

The Company's total cash and marketable debt securities at March 31, 2010 decreased \$30.1 million in 2010 to \$2,101.4 million. The Company's total cash and cash equivalents decreased \$57.3 million for the three months ended March 31, 2010 to \$1,854.7 million. This was primarily the result of \$285.4 million of cash provided by operating activities and \$40.5 million of cash provided by investing activities, offset by \$350.8 million of cash used in financing activities as summarized below.

Three Months Ended March 31	2010	2009
Operating activities:		
Net Income	\$ 68.3	\$ 26.3
Net income items not affecting cash	164.9	151.5
Changes in operating assets and liabilities	52.2	(87.0)
Net cash provided by operating activities	285.4	90.8
Net cash provided by investing activities	40.5	352.1
Net cash used in financing activities	(350.8)	(410.4)
Effect of exchange rate changes on cash	(32.4)	(62.8)
Net decrease in cash and cash equivalents	(57.3)	(30.3)
Cash and cash equivalents at beginning of the period	1,912.0	1,955.2
Cash and cash equivalents at end of the period	<b>\$ 1,854.7</b>	<b>\$ 1,924.9</b>

Cash provided by operations increased to \$285.4 million in the first three months of 2010 compared to \$90.8 million in the same period of 2009, primarily due to higher net income of \$42.0 million and lower pension contributions of \$133.9 million. Also included in cash provided by operating activities was lower cash provided from wholesale receivables (\$205.7 million) and less cash used in the reduction of accounts payable and accrued expenses (\$223.1 million).

Cash provided by investing activities decreased to \$40.5 million in the three months ended March 31, 2010 compared to \$352.1 million in the first quarter of 2009. In the first quarter of 2010, there were higher investments in equipment on operating leases of \$66.6 million and an increase in new loan originations of \$140.2 million in the Financial Services segment compared to the prior year due to increased new truck demand. In addition, proceeds from asset disposals were \$47.1 million lower in the first quarter of 2010 reflecting fewer used truck sales.

The cash outflow from financing activities in the first three months of 2010 of \$350.8 million was \$59.6 million lower than the first quarter of 2009. This was primarily due to \$68.5 million lower cash dividends paid.

**Credit Lines and Other:**

The Company has line of credit arrangements of \$3.69 billion, of which, \$3.36 billion was unused at the end of March 2010. Included in these arrangements are \$3.0 billion of syndicated bank facilities. Of the \$3.0 billion bank facilities, \$2.0 billion matures in June 2010 and \$1.0 billion matures in June 2012. The Company intends to replace these credit facilities as they expire with facilities of similar amounts. These credit facilities are maintained primarily to provide backup liquidity for commercial paper borrowings and maturing medium-term notes. There were no borrowings under the syndicated bank lines for the three months ended March 31, 2010.

PACCAR Inc periodically files shelf registrations under the Securities Act of 1933. The total amount of medium-term notes outstanding for PACCAR Inc as of March 31, 2010 was \$870.0 million. The current registration expires in 2011 and does not limit the principal amount of debt securities that may be issued during the period.

The total amount of medium-term notes outstanding for PFC as of March 31, 2010 was \$1,148.5 million. The registration expires in 2012 and does not limit the principal amount of debt securities that may be issued during the period.

At March 31, 2010, PACCAR's European finance subsidiary, PACCAR Financial Europe, had €850 million available for issuance under a €1.5 billion medium-term note program registered with the London Stock Exchange. The program was renewed in the third quarter of 2009 and is renewable annually.

On April 29, 2010, Standard and Poor's lowered the Company's credit rating from AA- to A+. The Company believes its strong liquidity position and Standard and Poor's A+ investment grade credit rating will continue to provide financial stability and excellent access to capital markets at competitive interest rates.

The Company provides funding for working capital, capital expenditures, research and development, dividends, stock repurchases and other business initiatives and commitments primarily from cash provided by operations. Management expects this method of funding to continue in the future.

Expenditures for property, plant and equipment in the first three months of 2010 totaled \$26.1 million compared to \$16.5 million in the first three months of 2009. Capital spending in 2010 is expected to be approximately \$175 - \$200 million compared to \$127.7 million in 2009. Research and development spending is expected to be \$225 - \$250 million compared to \$199.2 million in 2009. PACCAR's 2010 capital and research and development spending will continue to focus on manufacturing efficiency improvements, engine development and new product programs.
